

INTRO.

I am a PhD student at KAIST, advised by Prof. Seungryong Kim. My main research interest is general video perception, especially Track Any Point (point tracking) and vision-language understanding, and their applications to 3D/4D perception and reconstruction. I am closely working with Joon-Young Lee and Gabriel Huang at Adobe through a couple of internships, and before that, I collaborated with Google Research and Microsoft Research Asia (MSRA).
